LinkedIn – [M Naveen Chandra](#) | GitHub – [Naveenchandra29](#)

Bengaluru, Karnataka, India

OBJECTIVE

Engineering student with hands-on experience in embedded systems, ML-based hardware solutions, Android applications, Software Development and secure communication technologies through multiple real-world projects and internships. Interested in solving practical challenges through technology and looking forward to building a career in Software Engineering and product development.

EDUCATION

- Pre-University Course, *Narayana PU College, Bengaluru* [2022]
- Bachelor of Engineering in Electronics and Communication Engineering [2022-2026]
AMC Engineering College, Bengaluru
CGPA: 7.97/10

TECHNICAL SKILLS

- **Languages:** Python, Java, SQL, Kotlin, Golang
- **ML:** TensorFlow, Keras, OpenCV, CNN, Image Processing
- **Hardware Tools:** Arduino, Raspberry Pi, Sensor Interfacing, Embedded C, PWM Control, IoT Prototyping
- **Android:** Android Studio, Firebase, Jetpack Compose, REST APIs
- **Security:** TLS 1.3, Post-Quantum Cryptography (ML-KEM, X25519), mTLS
- **Development Tools:** VS Code, Git, Jira, Docker, Arduino IDE, Jupyter Notebook

EXPERIENCE

SP4 Ameya Engineering Solutions

[December 2025 – May 2026]

Research Intern (Hybrid)

- Gained practical exposure to Quantum Computing concepts, secure communication architectures, and Post-Quantum Cryptography through research-oriented training and implementation.
- Contributed to the development of a Quantum-Safe Banking Gateway focused on TLS-based secure communication, cryptographic policy enforcement, and quantum-resistant security approaches.
- Implemented hybrid TLS 1.3 + post-quantum cryptography (ML-KEM, X25519) in a quantum-safe banking gateway prototype; delivered workshop on Quantum Computing to 50+ students across 2 engineering colleges.

MindMatrix.io

[February 2026 – May 2026]

Android App Development Intern (Online)

- Engineered 15+ Android apps using Kotlin & Jetpack Compose, integrating Firebase real-time DB and GenAI workflows — covering healthcare, education, and rural digitalization use cases.
- Improved app quality through systematic debugging, testing, and UI/UX iteration across GenAI-integrated Android workflows using Jetpack Compose.
- Maintained structured GitHub repositories with detailed READMEs, backend integration docs, and real-time Firebase functionality for all 15+ projects.

PROJECTS

Oral Cancer Detection Using Raspberry Pi and CNN for Early Diagnosis

(Python, CNN, OpenCV, Raspberry Pi, Image processing, Tensor flow)

- Developed an AI-powered oral lesion detection system using CNN-based medical image classification.
- Implemented real-time image processing pipeline on Raspberry Pi using OpenCV for early diagnosis support and achieved 78% accuracy.
- Published research paper and patent for the proposed healthcare framework.

Matrix Headlight for Enhancing Night vision

(Embedded C, Arduino, LDR interfacing, PWM, LED matrix, real-time systems)

- Designed adaptive matrix LED headlights using Arduino and LDR sensors for intelligent beam management, reducing glare intensity by approximately 80%.
- Implemented real-time glare reduction and smart lighting control for enhanced nighttime driving visibility.
- Published patent for smart weather-adaptive matrix headlight system.

Quantum Safe Gateway

(TLS 1.3, Post-Quantum Cryptography, ML-KEM, X25519, Golang, Networking)

- Developed a secure gateway framework for TLS 1.3 communication using hybrid post-quantum cryptography concepts.
- Implemented secure communication workflows including mTLS handling, certificate validation, and cryptographic policy enforcement.
- Explored ML-KEM and X25519 integration for quantum-resistant secure communication architectures.

15+ Android Application Projects

(Kotlin, Firebase, Android Studio, Jetpack Compose)

- Developed 15+ Android applications including Nalla-Nudi, Kutira-Kushala, Kreedha-Ankana, and Namma-Pustaka across healthcare, education, tourism, and rural digitalization domains.
- Implemented Firebase integration, UI/UX development, real-time database workflows, and scalable Android application functionalities.
- Built mobile solutions using modern Android development practices, backend integration concepts, and real-time features.

SOFT SKILLS

S

Problem Solving, Team Collaboration, Adaptability, Fast Learner, Time Management, Analytical thinking.

ACHIEVEMENTS

- Best Project Innovation Award – I2CONNECT, IEEE Mangalore Section
- Received KSCST Government Project Grant Funding for Innovation Project
- Delivered Technical Workshop on “Quantum Computing Basics” at DSCE & AMCEC, Bengaluru
- Member – IEEE Signal Processing Society, participated in workshops on MATLAB, Embedded Systems, and Signal Processing and organized multiple events at the college level.

CERTIFICATIONS

- [HackerRank SQL \(Basic\) Skill Certification](#)
- [Infosys Springboard Course Completion on Data Structures and Algorithms](#)
